## About Us

Established in April 2002, Traveler Series was one of the first companies to enter the hotel comparison site industry. With over fifteen years of development by the RinconProject Group (RPG) it has become a major player in the online travel market. Tending to multiple demographics, we are devoted to connecting guests to hotels across the United States, Canada, and Great Britain. Major hotel groups recognize Traveler Series as not only the leading resource, but as a trusted and cost effective media for attracting new business.

### Our Mission

*“It is our mission to provide hotels with inexpensive marketing that results in an increase of business.”*

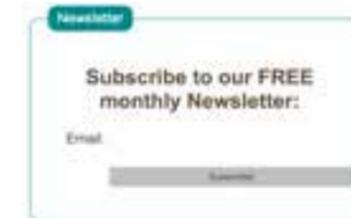

—Peter Hemming, Publisher

## Our Newsletter

TSI understands that building trusted relationships is the key to success in this highly competitive online hotel travel market. Because of strategic focus on delivering value, Traveler Series has been able to garner over 17,500 enhanced hotel listings with an overall accessible hotel database of

about 150,000 hotels. So how do we direct our guest to these hotels?

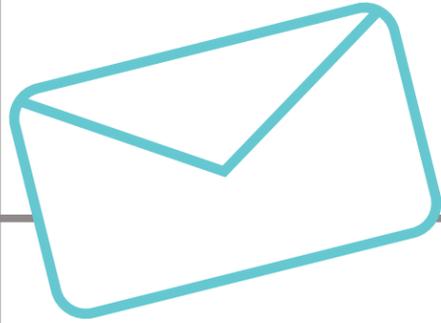

Each website links to our monthly newsletter and provides our guests with the option of becoming a subscriber. Over the years we have accumulated more than 2,000,000 subscribers who are interested in travel. Each month our subscribers receive an email that directs them to a composed list of articles from well known

sources. This gives them a varitey of travel news in one spot.

Each article links to that month’s featured hotel and to our four travel sites. This drives an average of 1,200,000 travelers in search of hotels to the Traveler Series each month. Because of its success, RPG has been able to forge joint marketing partnerships, recommendations, and endorsements amongst the

clients it serves. This includes large hotel groups that control the majority of hotel rooms in the United States across all the major and independent hotel brands.
